• I think S. Locke is a great asset to the Economics department at WKU. Economics does not come easy for a lot of students and he asks us what he can do to help us better understand the material rather than just assuming. His notes keep a standard format so we are use to it and can better understand it. He passes out graphs and charts that we can follow along with in class. He also always answers every question in the best way for that student providing them with examples and if they are still confused he offers them time at the end of class to hang back and teach them so they don't leave class confused. He is a great professor, it is not an easy class but he makes it so we can understand and do decently.

• good professor always specifies concepts

• A little difficult understanding harder concepts.

• Excellent professor.

• This course has been difficult at times but it has been enjoyable. I like the content of the class as well as the professors teaching styles of using a lot of practice problems to help us better understand material.

• good job

• I have never had a teacher try to help me understand the course as much as him. He truly cares about each and everyone of his students and the material he teaches. By far one of my best professors I have had.

• Professor Locke puts great effort into satisfying all students in the class, he makes sure everyone learns the material to their best ability in ways that they learn best. In this class, I've learned from my teacher better than I have in any other class that I've taken in college.

• One of the best teachers I have ever had. Knows how to engage the students, and make them want to learn more.

• One of the best professors I have ever had. A true professional, yet someone who is willing to connect with the student on a more down to Earth level. I have enjoyed the subject so much, mainly because of how he has taught it, I am considering adding it on as a minor or double majoring in it.

• Dr. Locke is an excellent professor. He is very easy to talk to. He explains topics in a manner that is easy to understand. He clearly has a extensive knowledge of the subject. He applies topics to real world occurances and makes them interesting to learn about. I would highly recommend him to anyone wanting to take an economics course. He is my favorite professor I have this semester.

10 - Please provide additional feedback:

Return Rate	8/47 (17.02%)

• Professor Locke is a very effective teacher for teaching microeconomics. I am a person who really does not care for economics because I'm typically not very good at it. Professor Locke really breaks down all the information and makes it a lot more simple then what most people could possibly do. The notes he takes in class and has us print off really, really help. Overall, one of my favorite and most effective teachers so far at WKU, and I'm a junior.

• This has been my favorite class this semester. I enjoyed the little assignments that were given such as reading an article before class to discuss. It helped me to better understand the concepts.

• I look forward to this class every week. He's a really good teacher and always tries to make every lesson interactive and enjoyable. He does review sessions before each test which are very helpful but doesn't give anything away about the test. He is always willing to go out of his way to help you and comes to class always (even when he was still on morphine from a kidney stone). I would definitely recommend him.

• Good teacher, I'd take another class that he taught.

• Great professor!

• This course has been challenging but enjoyable, questions on exams are sometimes worded poorly, but other than that I have no complaints. Dr. Locke is an excellent teacher.

• I think some topics could be more clearly explained.

• He is a great proffessor, very good at relating the material to real world situations.

• Hard class, but great professor. Provides study sessions that are extremely beneficial.

• Dr. Locke's lecture notes require that students come to class to get all of the information. Given the student attends class, the notes are very relevant to the concepts on exams. Dr. Locke quickly reviews the previous class' lecture before starting each lecture. It is helpful for me to hear the information twice in order to actually remember it. He makes sure the test and homework questions are fair and offers to help struggling students in and outside of class. Before each test he hosts a review session for students to come and ask questions. He also includes articles and examples from current issues in his lecture to help put the class concepts into perspective, but he does this without including his own opinion so students are prompted to think about the issues and form their own opinions.

• I have really learned a lot. He was a great professor.

• Very nice man, good at explaining.

10 - Please provide additional feedback:

• Stephen Locke is a very knowledgeable guy. He is willing to help if you put forth the effort. This has been a helpful and great course.

• Dr. Locke knows his stuff!!!

• Excellent professor, very clear and willing to work with students who have trouble grasping the information.

• He explains everything really well and will even work with you outside of class. He tries his best to get everyone to understand it and pass and highly recommended him for my friends to take him.

• Dr. Locke is a great professor, probably one of the best I've had so far. He's really just an overall cool dude.

• One thing that I enjoyed about Mr. Locke's teaching style is how he was able to give such helpful examples and provide ways to help his students get a better understanding of what he was trying to teach. The way he teaches shows that he understands what it is like to be a student in college. His class is one of the better ones I have taken so far.

• Professor Locke is great at answering questions and being responsive to the needs of the student. He has examples and practice problems ready to go every class just about.

• I thought professor Locke was great and he knows what he is talking about I just had a hard time understanding what was being taught because econ is something that I struggle to understand.

Response Rate	13/45 (28.89%)

• Dr. Locke is a very effective teacher. He was always willing to help with any homework questions I had, and he provided in class practice to allow us to determine what we need to work on versus what we understand. With that being said, I feel as though the homework that was assigned was relevant to the material, but it was pretty difficult. I found myself on almost every assignment not knowing how to do problems based on my notes, and I felt like I knew what was going on in class but not on the homework assignments. I also felt as though that the tests were very difficult compared to the material that was being covered. I knew exactly what was going on in the notes; however, I felt like the notes did not transition to the exam very well. Dr. Locke is a good professor, but I never could grasp how to master his homework and exams based on the notes in class.

• N/A

• Dr. Locke is one of the most helpful professors I've had my entire time at WKU. I am a history major and took this course as a requirement for my minor. Needless to say, economics is difficult for me and very out of my wheelhouse. He is patient and willing to explain concepts multiple times to me until I understand. I put a lot of effort into this class and I feel thoroughly challenged by the course work. I never felt like I would fail, however, because of how willing Dr. Locke is to help his students.

• very smart and friendly guy

• Dr. Locke is a fantastic professor who is always prepared and is very effective when he teaches. He is very helpful and encourages students to come by during office hours.

• Professor Locke is great. He makes classes interesting and fun and is very low-key. Was super sad when I found out he doesn't teach Economics 203. Wish I could take him again as a professor.

• Love how He teaches this class and makes it relatable for me to understand. I was not very good at econ in high school and he makes it very easy to understand the material no matter the difficulty of the topic.

• great teacher, could explain things a little more clearly, but a fantastic teacher. If I was an Econ major, I'd take him as much as possible

• Mr. Locke is one of the best professors that I have had to date. He is very passionate about what he teaches and teaches it very well. He is also very helpful outside out class and happy to help anyone who visits him during his office hours. In addition, he is a great, charismatic guy.

• Dr. Locke is...okay. I admire his passion for economics, however his teaching style was not effective for me. I don't have an interest in economics whatsoever, and I only took this course because it was a requirement. His notes did not help me learn, if anything it make learning more difficult. He probably shouldn't tell students that they don't need the textbook because I got the textbook, and it helped me with homework / studying for tests more than his notes ever would. I also wish that there were more tests, because 3 is not enough, especially since the material is often really challenging. There needed to be more opportunities to earn points and this would help. The only "fun" thing we did in his class was play "game theory" games. It provided an opportunity for us to earn extra points and learn about the material in a new way. If he could incorporate more activities / videos / games into his lectures that would probably make the material a lot easier to understand, and help students stay awake and pay attention in his class.

• Really good professor. His consistent teaching method made coming to class an option, but very necessary to get a good grade.

• Great teacher, just feel like the lessons are sometimes repetitive and very drawn out

• Dr. Locke is a great professor because he has high expectations of his students. As an economics teacher, he understands the importance of incentives, and he implements his accordingly. Typically, a lower numbered / elective would be an easy class, but ECON 202 has challenged me because a lot of the content is hard to keep up with if you're simply memorizing certain situations. I had to inherently understand the concepts in order to be able to perform well on the tests, and although many concepts were definitely difficult to wrap my head around, Dr. Locke was happy to answer questions and great about going over things in class. It is a very challenging course, but it's important to challenge students to the extent that a greater level of learning is encouraged, and that is what Dr.Locke does.

Response Rate	6/48 (12.5%)

• I have a hard time paying attention in Mr. Locke's class. Wish he was more engaging, gave better feedback, and gave more extra credit opportunity.

• It would have made it easier for me if my professor would have posted all of the quizzes and note outlines for the semester on blackboard at the beginning. I really liked the fact that my professor provided review sessions the night before the exam.

• Online quizzes and in-class assignments do not always align with the tests. The language used in the wording of the questions greatly differs and causes a lot of confusion come test day.

• Keep saying, "I can't make this stuff sexy."

• Dr. Locke is a really nice professor and seems to genuinely care for his students, however he seems to just "tell" us how to do things rather than showing us and helping us through the problems. For being an intro class I found it very difficult to grasp onto the content. Dr. Locke needs to understand that there are many students in there that are not Econ, Accounting, or Marketing majors. Honestly the only reason I took this course is because it was on my required courses list. Overall Dr. Locke was a good professor.

• Great class, it was a valuable learning opportunity! Thank you for the great semester!

• Dr. Locke is an incredible professor who effectively taught me microeconomics. He is one of the best professors that I have had.

• One of the smartest and most prepared people I have ever met. Always takes time to make sure everyone understands the material and holds extra review sessions out of class.

• Very well organized, always makes sure students understand topics before moving on, gives plenty of practice problems, provides plenty of review opportunities before tests, cares that we learn the material and not just know it for the test, overall great professor and would love to have him again!

- Dr. Locke is the excellent teacher, and he always explain details for us. Although sometimes he was tough, he did a perfect job based on objects about teaching.

- I appreciate the quizzes just to see what we know. That has helped me greatly this semester.

- this was a challenging course but do not miss a class and always do the homework

- Locke is seriously one of the best professors I have had so far!

- The class can be very complicated when working on graphs. More handouts with specific graph problems would be very helpful for those that struggle with it.

- Great course!

- Locke did a good job of making the content applicable; a lot of the theories got a little abstract, but he made a constant effort to show us how we might see them in day-to-day life. I think he should continue doing that, maybe even to a larger extent. (If you get to read these) This was a hard one to have at 8am, but I learned a lot- thanks!

10 - Please provide additional feedback:

Response Rate	8/47 (17.02%)

• Amazing teacher, but just a tough course material to learn he helps out alot though.

• Great teacher for those who aren't in the business college

• Microeconomics is overall a fairly easy class, especially once you've already taken macro, but a lot of the information is very interesting, and Locke has done a great job presenting it all in a way that makes sense.

• A very intellectually stimulating course and Dr. Locke does a great job of making the material relatable which promotes a deeper understanding. This information is applicable to the real world and I firmly believe it will aid me in my day-to-day life.

• Dr. Locke is a very hard, tough professor. He is also fair, he is willing to help if you ask.

• Dr. Locke has been one of the best professors I've had thus far in my college career due to his enthusiasm for the content as well as his effectiveness in teaching it. He engages those who otherwise would not have much of an opinion on Economics by relating the course content to their own lives in a clear way. He makes sure every concept is explained thoroughly, and the homework is spaced out enough to wear each concept is its own material without an overload of information that may otherwise fall through the cracks. I feel very lucky to have had him as an Economics professor, and this course has made me consider taking another class in this field due to my understanding now of the far reach it has.

• Dr. Locke is a great professor, yet I feel his course lacks adequate discussion that engages the student. Although a wonderful lecturer, he could be stronger at encouraging the class to discuss their thoughts and come to the conclusions on their own. He jumps to conclusions too quick, because the class generally fails to answer his questions. I feel that more group work and partner work would increase the level of participation in the course, that would then allow for a more engaged course attitude in his lectures. Overall, a great course with a lot of potential.

• Professor Locke is an excellent teacher who shows he cares about his students' wellbeing. He offers many kinds of help to ensure his students succeed. His teaching style is effective because he clearly explains new concepts, engages students with questions, and clears up any misconceptions or misunderstandings. He displays enthusiasm when discussing economic topics. Homework is offered as great practice for exams, and the exams line up perfectly with covered content. Students received great feedback on homework questions so we could better understand widely missed questions and concepts. I feel as if I took away a lot of knowledge from this course and I enjoyed it much more than I thought I would.
